

The Next 10 Customer Opportunities

Customer Clarity × Trust Readiness × Sales Action

Editable candidate working deck | Condensed version

Outcome promise

1

Clarify what is being sold and to whom

2

Define the right customer unit by business model

3

Score the next 10 acquisition opportunities

4

Convert top 3 into battle cards and actions

Startup Snapshot + Offer Clarity

Complete before the session. This page prevents the “everyone is my customer” problem.

Startup name / founder / sector

Voidlabs / Jamili Gowrish / AI/ML

How are you introducing your product/services to your customers?

Introduction of the product that works as the AI-receptionist

What is your primary focus - B2B/B2C/B2G?

B2B

Core customer problem

People waste time searching for and managing files scattered across devices and apps.

Outcome promised to customer

The users can recall and access any important digital content within seconds

Current proof that this outcome is possible

Prototype concept and positive feedback from potential users.

Need	What real problem exists now?
Want	What solution style do they prefer?
Desire	What emotional/business gain matters?
Trust	What must they believe before acting?

Digital content makes manual organization difficult.

Simple, natural-language search and reminder experience

peace of mind and increased productivity

The assistant must be accurate, secure, and protect user privacy

PMF Stage + Business Model + Customer Unit

Do not move to the Top 10 list until you define the customer unit. One consumer, one account, one government department, and one channel partner are not equivalent.

PMF stage	Evidence check	Select
Hypothesis	Idea + assumed customer; weak evidence	☐
Problem validation	Customer conversations, pain signals	☐
Value validation	Evidence of payment/engagement intent	☐
Market validation	Paid pilots, differentiated feedback	☐
Business model validation	Unit economics/repeatability emerging	☐
Growth readiness	Referrals, repeatability, sales beyond early adopters	☐

Business model	One customer opportunity means...
B2C	Cohort / community / lead pool / geo cluster
B2B	Named account with buyer, user, influencer, blocker
B2B2C	Partner/channel that unlocks end users
B2G	Department / scheme / tender / institutional pathway
Marketplace	Demand-side or supply-side activation target

Current PMF evidence

Hypothesis

My selected business model

B2B

My customer unit definition

Fixing uncontrolled data Sprawl

Trust Readiness

ROT: Trust as Acquisition Levers

Return on Trust (ROT) is derived from value promised, experience delivered, proof shown, risk reduced and customer movement

ROT Statement: Customers trust us

because REMIND uses AI to organize files and find them instantly, proven

by Accurate semantic search results, automatic file categorization, and seamless access across devices

____, resulting in higher employee productivity, reduced duplicate work, and faster decision-making.

Example 1:

Customers trust us because our test kit gives families a simple, reliable way to check drinking-water safety at home.
proven by lab-validated test accuracy, clear result explanations, repeat purchases, and customer referrals.
resulting in faster buying decisions, higher repeat usage, and stronger word-of-mouth in apartment communities.

Example 2:

Customers trust us because we help small businesses stay compliant without confusion, delays, or last-minute stress.
proven by on-time filings, fewer compliance errors, client testimonials, and renewal of monthly retainers.
resulting in longer client relationships, more referrals, and reduced hesitation to hand over financial work.

Tip: ROT is not a simple metric. It is derived from value promised, value perceived, experience delivered, proof shown, risk reduced, and trust earned.
